KBDi MEMBER TIP

Ensure your kitchen's
design complements the
rest of the home.

KBDi MEMBER: THINKDZINE

Dean Welsh from ThinkDzine has been creating spaces for more than two decades and has been a KBDi member for seven years. In his award-winning designs, he demonstrates a true knack for combining the bigger vision with small, immaculate details that take rooms from ordinary to extraordinary.

When ThinkDzine was approached for this renovation, the brief was simple: to create a kitchen ideal for a young family and to complement the rest of the home. It needed to be functional and able to be used for small gatherings as well as large functions.

Raw, natural materials were used to create a casual dining space that links the inside living zone to the outdoor entertaining area. For a striking contrast, dark, rich veneer was chosen to add warmth and texture to the kitchen. Finished in a bright white, open-shelf boxes double as additional storage and a display unit, perfect for showcasing crockery and recipe books.

Sustainability is a recurring theme in this kitchen, with joinery sourced from responsibly managed forests. The wood veneer has a vegetable oil finish while doors and open shelves shine in white water-based acrylic paint. It's easy to go green with kitchen envy in this beautiful space.
