

EXPERT TIP

Consider lift-up mechanisms on your overhead cabinetry to make access easy.

THE STARRY NIGHT

The mystery of midnight awaits you in this kitchen from ThinkDzine. Here, the dark and moody colour palette is reminiscent of the dramatic night sky, with the fraction mosaic tiles of the splashback the glittering stars.

The textured dark cabinetry makes a statement as you first walk into the room. The benchtop is the aptly named Black Galaxy, further enhancing the starry theme. Even the sink and tap are beautiful, black and brilliant.

Open wooden shelves add warmth to the room and allow a space for the owners to display personal items that make this area feel less like a kitchen and more like an extension of the home. This timber is continued in the wood wall lift-up cabinets over the stovetop, with LED lighting shining down beneath them and highlighting the sparkling splashback.

Durable materials have been used

throughout, ensuring this kitchen will stand the test of time and still be loved in years to come.

One of our favourite features of the room is its clever layout. This space is partially obscured from the living area. When you step inside the kitchen, it truly makes a glamorous statement. The only thing competing for your attention is the striking view of the harbour in the distance.
